Lecture 17

Feb 19-8:47 AM

Given $P(A) = .75$, $P(B) = .45$ $P(A \text{ and } B) = .30$

1) $P(\bar{A}) = 1 - P(A) = \boxed{.25}$ ↑
overlap

2) $P(\bar{B}) = 1 - P(B) = \boxed{.55}$

3) $P(A \text{ or } B) = P(A) + P(B) - P(A \text{ and } B)$
↑
addition Rule $= .75 + .45 - .3 = \boxed{.9}$

4) $P(\overline{A \text{ and } B}) = 1 - P(A \text{ and } B) = 1 - .3 = \boxed{.7}$

5) $P(\overline{A \text{ or } B}) = 1 - P(A \text{ or } B) = 1 - .9 = \boxed{.1}$

6) Make Venn Diagram.

Overlap $\rightarrow ANB \rightarrow$

$P(A \text{ only}) = P(A) - P(A \text{ and } B)$
 $= .75 - .3 = .45$

$P(B \text{ only}) = P(B) - P(A \text{ and } B)$
 $= .45 - .3 = .15$

7) $P(A \text{ only OR } B \text{ only})$
 $= .45 + .15 = \boxed{.6}$

Total = 1

Mar 7-7:17 AM

De Morgan's Law:

$$P(\bar{A} \text{ and } \bar{B}) = P(\overline{A \text{ or } B})$$

$$P(\bar{A} \text{ or } \bar{B}) = P(\overline{A \text{ and } B})$$

From last example $P(A \text{ and } B) = .3$ $\therefore P(A \text{ or } B) = .9$

$$\text{find } P(\bar{A} \text{ and } \bar{B}) = P(\overline{A \text{ or } B}) = 1 - P(A \text{ or } B) = 1 - .9 = \boxed{.1}$$

$$\text{find } P(\bar{A} \text{ or } \bar{B}) = P(\overline{A \text{ and } B}) = 1 - P(A \text{ and } B) = 1 - .3 = \boxed{.7}$$

Mar 7-7:28 AM

A standard deck of playing cards has 52 cards, 26 red, and 12 face cards.

Draw one card, Do not simplify answers.

$$1) P(\text{Red}) = \frac{26}{52} = \boxed{\frac{1}{2}}$$

$$2) P(\text{Face}) = \frac{12}{52} = \boxed{\frac{3}{13}}$$

$$3) P(\text{Red and Face}) = \frac{6}{52} = \boxed{\frac{3}{26}}$$

$$4) P(\text{Red or Face}) = P(\text{Red}) + P(\text{Face}) - P(\text{Red and Face})$$

$$= \frac{26}{52} + \frac{12}{52} - \frac{6}{52} = \frac{32}{52} = \boxed{\frac{8}{13}}$$

$$5) P(\overline{\text{Red and Face}}) = P(\overline{\text{Red or Face}})$$

By De Morgan's Law $= 1 - \frac{32}{52} = \boxed{\frac{16}{52}} = \boxed{\frac{4}{13}}$

$$6) P(\overline{\text{Red or Face}}) = P(\overline{\text{Red and Face}}) = 1 - \frac{6}{52} = \boxed{\frac{46}{52}}$$

$$\boxed{\frac{23}{26}}$$

Mar 7-7:32 AM

$P(A) = .8$ 1) $P(\bar{A}) = 1 - P(A) = \boxed{.2}$
 $P(B) = .15$ 2) $P(\bar{B}) = 1 - P(B) = \boxed{.85}$
 $A \text{ \& B are M.E.E.}$
 3) $P(A \text{ and } B) = \boxed{0}$ 4) $P(A \text{ or } B) = P(A) + P(B) - P(A \text{ and } B)$
 $= .8 + .15 - 0 = \boxed{.95}$
 5) Make Venn Diagram

6) $P(\bar{A} \text{ and } \bar{B}) = P(\overline{A \text{ or } B})$ Total = 1
 By DeMorgan's Law $= 1 - P(A \text{ or } B) = 1 - .95 = \boxed{.05}$
 7) $P(\bar{A} \text{ or } \bar{B}) = P(\overline{A \text{ and } B}) = 1 - P(A \text{ and } B)$
 $= 1 - 0 = \boxed{1}$

Mar 7-7:44 AM

A survey was conducted. Do You text while driving?

	Yes	NO	Total
Males	80	30	110
Females	15	75	90
Total	95	105	200

1) Complete the chart
 2) Survey Size 200
 If we randomly select one person, find
 1) $P(\text{Male}) = \frac{110}{200} = \boxed{.55}$ 2) $P(\text{Yes}) = \frac{95}{200} = \boxed{.475}$
 3) $P(\text{Male and Yes}) = \frac{80}{200} = \boxed{.4}$ $\begin{matrix} \text{SG. 10} \\ \text{\&} \\ \text{SG. 11} \end{matrix}$
 4) $P(\text{Male or Yes}) = \frac{125}{200} = \boxed{.625}$
 5) $P(\overline{\text{Male and Yes}}) = P(\overline{\text{Male OR Yes}}) = 1 - .625 = \boxed{.375}$
 De Morgan's Law
 6) $P(\overline{\text{Male or Yes}}) = P(\overline{\text{Male and Yes}}) = 1 - .4 = \boxed{.6}$

Mar 7-7:56 AM

Class QZ 3:

Given $P(A) = .7$, $P(B) = .6$, $P(A \text{ and } B) = .5$

1) $P(\bar{A}) = 1 - .7 = \boxed{.3}$

3) Construct Venn Diagram.

2) $P(A \text{ or } B) =$
 $.7 + .6 - .5 = \boxed{.8}$

Total = 1

Mar 7-8:11 AM
