Lecture 55

Feb 19-8:47 AM

Comparing at least 3 Pop. Means: SG 35

$$H_0: \mu_1 = \mu_2 = \mu_3 = \dots = \mu_k$$

H_1 : At least one mean is different. RTT

$k \rightarrow$ # of Samples

$$k-1 = \text{Ndf}$$

$n \rightarrow$ Total Sample Size

$$n-k = \text{Ddf}$$

Store each sample into a list.

CTS F

P-value P

\Rightarrow ANOVA(L1, L2, L3, ...)

P-value method:

P-value $> \alpha \Rightarrow H_0$ valid, H_1 invalid

P-value $\leq \alpha \Rightarrow H_0$ invalid, H_1 valid

Final conclusion must be about claim.

Reject the claim OR FTR the claim

May 23-7:16 AM

chart below shows ages of students from 3 different colleges:

ELAC			Mt. SAC			Chaffey		
28	32	40	22	34	45	17	34	45
18	25	20	18	19	25	20	24	
30	24		26			19		

$k=3$
 $n=8+7+6=21$
 $DfS=k-1=2$
 $DfE=n-k=18$

use $\alpha=.1$ to test the claim that all Pop. means are equal.

$H_0: \mu_1 = \mu_2 = \mu_3$ claim

H_1 : At least one mean is different. RTT

ELAC \rightarrow L1, Mt. SAC \rightarrow L2, Chaffey \rightarrow L3

STAT TESTS ANOVA(L1, L2, L3) Enter

CTS F = .009

P-value $> \alpha$

Valid claim

P-value P = .991

H_0 Valid, H_1 invalid

FTR the claim

May 23-7:23 AM

I randomly selected exams from four different classes:

L1 Morning		L2 Afternoon		L3 Evening		L4 Online	
72	85	70	88	78	82	86	90
90	100	92	98	94	90	88	78
80		65		60		100	95

Clear all lists, store these scores in L1, L2, L3, and L4

$k=4$
 $n=5+5+5+8=23$
 $DfS=k-1=3$
 $DfE=n-k=19$

use $\alpha=.01$ to test the claim that all pop. means are the same.

$H_0: \mu_1 = \mu_2 = \mu_3 = \mu_4$ claim

H_1 : At least one pop. mean is different. RTT

ANOVA(L1, L2, L3, L4)

CTS F = 1.088

P-value $> \alpha$

H_0 Valid

H_1 invalid

Valid claim

P-value P = .378 ✓

FTR

the claim

May 23-7:48 AM

Example for SG 31
 use the chart below to test the claim that $\sigma_1 \neq \sigma_2$.

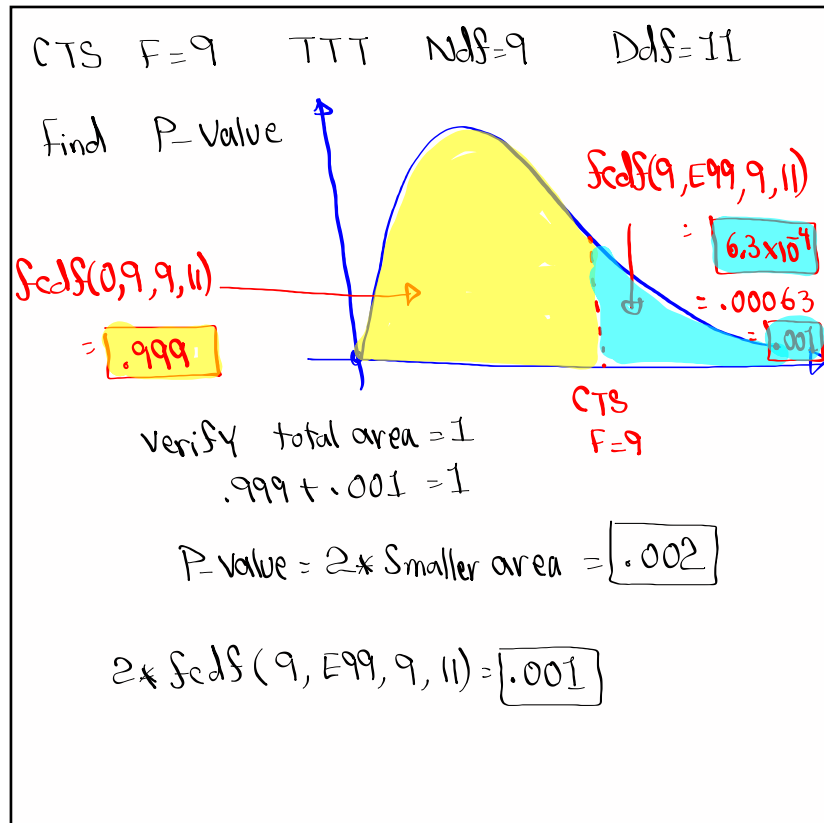

Sample 1	Sample 2
$n_1 = 10$	$n_2 = 12$
$S_1 = 15$	$S_2 = 5$

$Ndf=9$ (pointing to $n_1=10$)
 $Ddf=11$ (pointing to $n_2=12$)

- 1) Is $S_1 > S_2$? ✓
- 2) CTS Formula
 $F = \frac{S_1^2}{S_2^2} = \frac{15^2}{5^2} = 9$
- 3) $H_0: \sigma_1 = \sigma_2$
 $H_1: \sigma_1 \neq \sigma_2$ claim, TTT
- 4) CTS $F=9$
 P-value $P=.001$
- 5) P-value $\leq \alpha$
 $.001 \leq .05$
 H_0 invalid
 H_1 valid \rightarrow Valid claim
 FTR the claim
